Feedback on
Guideline 01/2021 on Examples regarding Data Breach Notification Version 1.0

Dear Team,

I would like to give a short feedback on your request for consultation on above mentioned guidelines.

I was pleased to see that the used breach cases have been discussed and that especially mitigations have been listed. Considerung this the Title of the Document might not reflect the value this document actually gives.

I would recommend to amend the title to reflect this, like
"Examples regarfing Data Breach Notifications and Mitigations"
or similar.

Also the actual reason I looked at the Document was, that I was interested if there would be actual guidance on wording and content of SA and Subject Breach Notifications. Maybe a checklist or example can be added to cover exactly this aspect?

Greetings
Bernd
